

# FAMILY FIRST PREVENTION SERVICES ACT

Report Dates: 10/1/2019 - 9/30/2024

## FAMILY FIRST SUBSTANCE USE SERVICE REFERRALS

### 383 Referrals

**Our Goal:** The Kansas Family First Prevention Service Evaluation examines the impact of prevention programs to strengthen families and prevent child welfare involvement in the state of Kansas. This project assesses implementation and outcomes related to the delivery of these community-based programs targeting mental health, parent skill building, kinship navigation, and substance use. Our goal is to provide evidence of the effectiveness of prevention services in Kansas to keep children safely with their families whenever possible.

**Substance Use** services include treatment services delivered by a qualified clinician, such as Substance Treatment and Recovery Teams (START), Parent Child Assistance Program, Strengthening Families and Seeking Safety. Substance Use services account for 6% of all Family First Referrals statewide.

## BY THE NUMBERS

### Family First Substance Use Outcomes

83%

of target children and youth who have reached 12 months from the time of service referral remained together at home without need for foster care.\* (GOAL: 90% of cases)

93%

of families referred to Family First were engaged timely in services (within 2 days). (GOAL: 95% of cases)

49%

of cases served and closed had successfully completed the referred service. (GOAL: 95% of cases)

10%

of target children and youth served have been placed in foster care during an open Family First case.\* (GOAL: Less than 10% of cases)

\*Target children are candidates for care within the target age range of the referred program
